## SKILLS

|                 |                                                              |
|-----------------|--------------------------------------------------------------|
| Languages       | C++, JavaScript, HTML, CSS                                   |
| Frameworks      | Node JS (Library), React (Library)                           |
| Tools/Platforms | AWS, Docker, Kubernetes, Git, GitHub Actions                 |
| Databases       | MySQL, DynamoDB                                              |
| Concepts        | Data Structure & Algorithms                                  |
| Soft Skills     | Problem-Solving, Leadership, Critical Thinking, Adaptability |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |              |

| <b>ParkEasy</b>   <a href="#">GitHub</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | May 2026     |
| <ul style="list-style-type: none"><li>Engineered a full-stack parking management platform utilizing Node.js and Express to handle real-time slot allocation, reducing booking latency and streamlining backend processing.</li><li>Containerized the application layers using Docker to ensure environment consistency, isolation, and rapid deployment workflows across staging and production environments.</li><li>Deployed and hosted the containerized architecture on AWS, configuring secure networking, identity access policies, and virtual servers to ensure reliable application availability.</li><li>Designed and optimized a relational database schema in MySQL using indexing and normalization strategies to manage high-frequency data for parking inventory, user profiles, and transaction logs.</li><li><b>Tech Stack:</b> React, Node.js, Express, MySQL, Docker, AWS, JavaScript, Git.</li></ul> |              |
| <b>FeatureForge</b>   <a href="#">GitHub</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | January 2025 |
| <ul style="list-style-type: none"><li>Developed a real-time dashboard using React and Node.js, allowing teams to monitor feature rollout metrics and user engagement through interactive visualizations.</li><li>Implemented a secure RBAC (Role-Based Access Control) system to manage team permissions and ensure only authorized users could modify production environments.</li><li>Containerized the application using Docker and orchestrated deployment via Kubernetes to ensure high availability and scalability across cloud environments.</li><li><b>Tech Stack:</b> Node.js, React, Docker, Kubernetes, MySQL, GitHub Actions, JavaScript.</li></ul>                                                                                                                                                                                                                                                         |              |

## CERTIFICATES

|                                                                                    |               |
|------------------------------------------------------------------------------------|---------------|
| • Data Structures and Algorithms   <a href="#">Link</a>                            | November 2025 |
| • Master Generative AI & Generative AI Tools   <a href="#">Link</a>                | October 2025  |
| • Build Generative AI Apps and Solutions with No-Code Tools   <a href="#">Link</a> | October 2025  |
| • NPTEL - Social Networks   <a href="#">Link</a>                                   | June 2024     |

## ACHIEVEMENTS

|                                                                                        |                |
|----------------------------------------------------------------------------------------|----------------|
| • Secured Top 10 position in Smart India Hackathon among 100+ Teams and 1000+ Students | September 2025 |
| • Speaker at IECON24 and IECON25                                                       | April 2025     |
| • Team Lead in L'Oreal Sustainability Challenge among 50+ Student Volunteers           | January 2025   |
| • Secured Advanced Milestone in Google Arcade and achieved Google Cloud Skills         | January 2025   |

## EDUCATION

|                                                                                                                        |                                                |
